LUMENFORGE

INTERACTIVE 3D STUDIO

# Websites you can walk through.

We model your product in Blender, bake the geometry with bpy, and ship it as a Three.js + React site that loads under two seconds on a mid-range phone. Not a video. Not a slideshow. A place.

## THE PROBLEM

Customers judge size, material and finish from a flat photo — and guess wrong at the exact moment they would have bought.

Video cannot be explored, and most 3D sites are 40 MB showreels that melt a phone.

## WHAT WE BUILD

3D commerce — every piece is an object you rotate, place, buy.

3D real estate — every unit walkable, sun studies baked in Blender.

Product launches — a scroll reveal worth forwarding.

## PROOF

Atelier Nova
+38% add-to-cart, 1.9 MB

Meridian Towers
3.1x longer sessions

Kinetic Labs
2.4M campaign views

<= 8 draw calls · 60 fps

## FIXED SCOPE, FIXED NUMBER

SPARK
**$4,800**
2 weeks
1 walkthrough scene + 3 stills

FORGE
**$12,500**
3-5 weeks
up to 5 rooms, CMS, launch kit

FOUNDRY
**$3,900/mo**
rolling
2 scenes per sprint + monitoring

## THE FORGE

**Blockout · Forge · Budget · Wire · Harden**

**Send us your product. We send back a room.**
