KILN

INTERACTIVE ARCHITECTURE

Rooms, not pages.

We model your space in Blender, light it with bpy, and ship it as a React site that loads in under two megabytes and holds sixty frames on a phone. Not a video. Not a slideshow. A place you can walk around.

THE ARGUMENT

Customers judge scale, material and finish from a flat photograph — and guess wrong at the exact moment they would have bought.

Video cannot be explored, and most 3D sites are forty-megabyte showreels that melt a phone.

WHAT WE BUILD

Commerce — every piece is an object you turn, place and buy.

Property — every unit walkable, sun studies baked in Blender.

Launch — a reveal worth forwarding, cut from the same scene.

PROOF

Atelier Nova
+38% add-to-cart, 1.9 MB

Meridian Towers
3.1× session length, 48 units

Kinetic Labs
2.4M campaign views

FIXED SCOPE, FIXED NUMBER

SPAR

$4,800

2 weeks

One walkthrough scene, three stills

KILN

$12,500

3–5 weeks

Up to five rooms, CMS, launch kit

FIRING

$3,900/mo

rolling

Two scenes per sprint, monitoring

THE METHOD

Blockout · Forge · Budget · Wire · Harden

Each stage has an artefact you can open and a number it has to hit.

Send the product. We send the room.
